TOCCO

INTRODUCING TOCCO IV

The Umbro Tocco redefines touch and takes it to the next level. The target customer is the pass master, who has far more touches on the ball. Whether it's the creative midfielder or the ball playing defender, interaction with the ball is vital and the need for the perfect touch and pinpoint pass accuracy are key requirements for success. This player also covers greater distances and therefore comfort and durability are also key performance factors.

The Umbro Tocco IV is the ultimate hybrid boot featuring both Pittards Armor-Tan® Leather. Pittards Armor-Tan® Leather enhances the players feel on the ball, allowing them to control the ball better. The microfibre to the rear quarter provides support and stability – key factors for excellent control of the ball.

Pittards Armor-Tan®

Pittards Armor-Tan® is a new generation of performance leather, providing more abrasion resistance and durability. Enhanced Grip and Water Resistant technologies (Gripster™ and WR100X™) deliver superior grip and water resistance without losing any of the softness or natural feel of the leather.

Lightweight Ripstop Rear Quarter

A lightweight ripstop rear quarter adds security to the mid-foot for a comfortable locked-in fit. This means that the foot will not slide within the boot and the player can have better control over their game.

Comfort Insock

The anatomical, low profile insock follows the contours of the foot for optimum comfort.

Pebax Powered Control+ Outsole

The dual-density Pebax Powered Control+ outsole features Wishbone technology. This dual density construction means that the levels of stiffness throughout the outsole can be controlled and deployed where needed. The unique Wishbone configuration provides rigidity in the rear and midfoot sections, whilst maintaining flexibility in the forefoot to deliver maximum energy return. This ensures the boot moves naturally with the foot.

Features & Benefits

Pittards Armor-Tan®

Pittards Armor-Tan® is a new generation of performance leather, providing more abrasion resistance and durability. Enhanced Grip and Water Resistant technologies (Gripster™ and WR100X™) deliver superior grip and water resistance without losing any of the softness or natural feel of the leather.

Lightweight Ripstop Rear Quarter

A lightweight ripstop rear quarter with TPU support frame overlay adds security to the midfoot for a comfortable locked-in fit. This means that the foot will not slide within the boot and the player can have better control over their game.

"Wishbone" Technology

"Wishbone" technology provides stiffness at the rear and arch of the foot while promoting flex at the forefoot. This ensures the boot works in conjunction with the motion of the foot.

Dual density lightweight Pebax control+ outsole for maximum energy return. Stud position & geometry have been designed for maximum grip and endurance.

VELOCITA

INTRODUCING VELOCITA ELIXIR

The Umbro Velocita Elixir is for the player whose game is about multi-directional speed. Short, sharp bursts of energy and sudden changes of direction are key features of the speed player. They are looking for a boot that fits like “a second skin”, is lightweight and allows the player to focus on the game.

During sharp and extreme movements of the foot, it changes its shape. The Umbro Velocita Elixir aims at combining lightweight, adaptive fit with multi-directional agility to ensure the boot can accommodate for any changes to the foot.

The Umbro Velocita Elixir features second generation ProWeave upper for an even more adaptable fit. The patented technology consists of a unique weaving process combining zones of differing elasticity, stability and abrasion seamlessly. With this upper material the Umbro Velocita Elixir provides support and flexibility where it’s required for a truly adaptive fit allowing the boot to move naturally with the foot.

The highly innovative ProWeave upper is combined with a Pebax Powered Sprint+ outsole featuring a unique stud configuration for maximum traction and speed in all directions.

ProWeave

The woven, one-piece, single layer upper is constructed from Pro Weave - a revolutionary material for the creation of jacquard fabrics with multiple zones of elasticity and stability.

Sustainability

In our continued effort to reduce our impact on the environment, recycled polyester yarns have been incorporated into the woven upper and laces.

Speed Insock

The anatomically contoured, low profile insock is lightweight without compromising comfort.

Pebax Powered Sprint+ Outsole

This outsole combines angular and conical studs to provide maximum traction in all directions.

VELOCITA ELIXIR

Features & Benefits

ProWeave technology allows us to seamlessly connect differing areas of elasticity, stability and abrasion so we can create targeted zones within the upper. This allows us to tune the boot to provide an adaptive fit within a single outer layer.

The Umbro Velocita Elixir features second generation ProWeave providing a lighter, thinner and more flexible woven upper. Strength, support and flexibility are woven into different zones of the upper allowing the boot to work in tandem with the natural movement of the foot. Woven support spars run throughout the upper for toe to heel stability whilst raised TPU yarns provide full surface grip.

ProWeave uses a unique manufacturing process that involves less energy consumption whilst the introduction of recycled materials supports our efforts to reduce waste.

Pebax Powered technology delivers a lightweight highly durable outsole. The Pebax unique formulas enable us to maximise energy return whilst providing the necessary support and stability.

The Pebax Powered Sprint+ outsole delivers explosive pace with it's unique stud configuration and high energy properties. Designed to give maximum traction in all directions.

- 6.2 The Customer undertakes that at no point, whether during the term of this Contract or any time thereafter, shall it do anything to prejudice or damage Outerstuff's ownership of, interest in or rights to use (in each case as applicable) the Intellectual Property Rights in the Protected Materials. The Customer undertakes and agrees that it has no right to and shall not (nor directly or indirectly allow, permit or enable any third party to) copy, adapt, reverse engineer, decompile, disassemble, modify or use any Protected Materials in whole or in part other than in accordance with this Contract or Outerstuff's express prior written consent.
- 6.3 The Customer shall comply with all rules for the use of the Protected Materials issued by Outerstuff (including those set out in any branding manual issued by Outerstuff whether issued on its behalf or on behalf of any Brand Owner).
- 6.4 Outerstuff makes no representation or warranty as to the validity or enforceability of the Intellectual Property Rights in the Protected Materials, nor as to whether they infringe the Intellectual Property Rights of any third parties.

In the event of any errors or omissions on an invoice, Outerstuff shall have the right to re-issue a corrected version of the same within a reasonable time following the discovery of such error or omission.
- 7.5 If the Customer fails to make any payment due to Outerstuff under the Contract by the due date for payment, then the Customer shall pay interest on the overdue amount at the rate of four per cent (4%) per annum above the base lending rate issued by LIBOR from time to time. Such interest shall accrue on a daily basis from the due date until actual payment of the overdue amount, whether before or after judgment. - (b) the Customer takes any step or action in connection with its entering administration, provisional liquidation or any composition or arrangement with its creditors (other than in relation to a solvent restructuring), being wound up (whether voluntarily or by order of the court, unless for the purpose of a solvent restructuring), having a receiver appointed to any of its assets or ceasing to carry on business; or
- (c) the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business.
- 8.2 On termination of the Contract for any reason: (a) the Customer shall immediately pay to Outerstuff all of Outerstuff's outstanding unpaid invoices and interest; and (b) Outerstuff shall have the right to cancel any Orders for Products placed by the Customer before termination if delivery would fall due after termination, whether or not such Order has already been accepted.
- 8.3 Termination of the Contract shall not affect any of the Parties' rights and remedies that have accrued as at termination, including the right to claim damages in respect of any breach of this Contract that existed at or before the date of termination. Any provision of the Contract that expressly or by implication is intended to come into or continue in force on or after termination (including clauses 5.3 and 6 to 12) shall remain in full force and effect.

- 9.3 Subject to clauses 9.1 and 9.2, Outerstuff's total aggregate liability to the Customer, in respect of any loss incurred by the Customer arising under or in connection with the Contract and any Order, whether in contract, tort (including negligence) or restitution, breach of statutory duty, misrepresentation or otherwise, shall under no circumstances exceed the amount paid by the Customer to Outerstuff for the Products in the twelve (12) months immediately prior to the event giving rise to the loss.

- (b) any claim made against Outerstuff by a third party arising out of or in connection with the supply of the Products by the Customer to such third party, to the extent that such claim arises out of the Customer's breach, negligent performance or failure or delay in performance of this Contract or any Order;

- 11.4 Clause 11.1, clause 11.2 and clause 11.3 do not apply to information which:
- (a) is at the time of disclosure in, or thereafter comes into, the public domain other than through breach of this Contract by the Receiving Party or a Recipient; or
- (b) was known to the Receiving Party (without obligation to keep such information confidential) at the time of disclosure by the Disclosing Party;
- (c) becomes available to the Receiving Party on a non-confidential basis from a source other than the Disclosing Party (provided that such source, to the knowledge of the Receiving Party, is not or was not bound to maintain the confidentiality of such information); or

- 11.5 No Party shall use any other Party's Confidential Information for any purpose other than to perform its obligations under this Contract or any Order.
- 12. GENERAL**
- 12.1 **Force Majeure.** Neither Party shall be in breach of the Contract nor liable for delay in performing, or failure to perform, any of its obligations under this Contract if such delay or failure result from a Force Majeure Event. In such circumstances the affected Party shall be entitled to a reasonable extension of the time for performing such obligations. If the period of delay or non-performance continues for ninety (90) days, the Party not affected by the Force Majeure Event may terminate this Contract by giving thirty (30) days' written notice to the affected party.

- 12.4 **Variation.** No variation of this Contract shall be effective unless it is in writing and signed by the Parties (or their authorized representatives).
- 12.5 **Waiver.** A waiver of any right or remedy is only effective if given in writing and shall not be deemed a waiver of any subsequent breach or default. A delay or failure to exercise, or the single or partial exercise of, any right or remedy shall not: (a) waive that or any other right or remedy; nor (b) prevent or restrict the further exercise of that or any other right or remedy.
